

My Best Friend Maria Written by Trevor Yates

[Verse]

I met her in the shadow of a darkened street
She pulled me from the fire put me on my feet
Her laughter lit the sky like sparks in the night
Maria's got a soul that burns so damn bright

[Verse 2]

We'd scream at the stars till they faded away
Through the cracks of the world holding back the day
Dancing through the wreckage through the chaos and rain
Maria's my compass when I'm lost in pain

[Chorus]

Maria you're the fire in the chill of the storm
Carving out your name where the legends are born
Through the ashes and the thunder you're always near
Maria my best friend I hold you sincere

[Verse 3]

We built our dreams on whispers and broken glass
Running through the echoes of a haunted past
Every scar a badge every tear a song
Maria's the strength when I can't go on

[Bridge]

When the walls keep falling and the glass blades cut
Maria stands tall when the whole world's shut
She's the voice in the night
The light in my haze
Through the chaos of life she's my saving grace

[Chorus]

Maria you're the fire in the chill of the storm
Carving out your name where the legends are born
Through the ashes and the thunder you're always near
Maria my best friend I hold you sincere
